

# High Speed EXILIM EX-FC100

Speed in its sights

HIGH SPEED  
**EXILIM**

- ▶ 9.1 megapixels
- ▶ 5x optical zoom with mechanical image stabiliser
- ▶ High-speed serial picture recording with up to 30 photos per second
- ▶ High-speed film recording with up to 1,000 fps
- ▶ Bright and high-contrast 6.9 cm (2.7 inch) TFT colour display (Super Clear LCD)

## ADDITIONAL FEATURES

### Slow-motion function

With this function, the movement of the motif can be monitored in replay on the TFT colour display to ensure that you press the release button at precisely the right moment when the perfect photo is in view.

### Pre-record mode

With continuous recording of up to 30 photos per second, a maximum of 25 photos can be saved in the camera's buffer memory — even before the shutter release button is pressed.

### High-speed anti shake and high-speed night shot

The two BEST SHOT motif programmes can combine several photos from a photo sequence, joining the positions of the motif to create an optimal photo.

### HD video recording

With the HD video recording, you can take high-resolution, extremely detailed videos\*.

### High-Speed Best Selection

To ensure that you capture the perfect moment, the EX-FC100 can select the best photos from a series of shots automatically – showing a smiling face, open eyes and without blurring.

### Lag Correction

Never miss a thing: with the lag correction function, the EX-FC100 selects the photo which corresponds to the set lag from the temporary serial picture memory.

The High Speed EXILIM EX-FC100 is available to buy from specialist dealers, shopping centres, electrical goods stores and all good shops.

\*Max. recording length 10 minutes/video
