- ▶ EXILIM Engine 4.0
- ▶ 3x optical zoom
- ▶ 6.9 cm (2.7-inch) Wide Screen TFT colour display
- ▶ HD video recording

## ADDITIONAL FEATURES

### Dynamic Photo Function

With the Dynamic Photo Function, you can cut a motif out of a photo which has just been taken and use another photo as background. To display a moving object, it is even possible to use several photos from a serial picture recording.

### Face detection function

Whether you're on holiday, at a party or spending time with your family - people are particularly popular subjects for a photo. It's always a pity when faces turn out blurred on a picture. The Face Detection function now offers the perfect solution, recognizing the individual faces or even entire groups, and automatically applying the best possible setting.

### Make-up shot function

Simply press the Make-up Shot Button and the Make-up Shot Function visibly smoothes skin and reduces shades caused by strong sunlight and bright light conditions.

### Multi-motion function

The BEST SHOT function Multi-Motion-Image enables you to capture a movement sequence in just one single photo.

### BEST SHOT motif programmes

To ensure that all your photos and movies are a success from the start, the EX-S12 comes with 41 flexible presettings for a wide range of situations.

### Auto Shutter Function

The Auto Shutter Function is activated automatically as soon as the camera is stable enough to guarantee optimal photos.

The EXILIM Card EX-S12 is available to buy from specialist dealers, shopping centres, electrical goods stores and all good shops.
